# Saving Data To Mongo

Saving data to the database using the save()
method from mongoose.

- Create file "saving_test.js" in the folder "test"

mongoDB.

```javascript
const assert = require('assert');
const MarioChar = require('../models/mariochar');

// Describe our tests
describe('Saving records', function(){

  // Create tests
  it('Saves a record to the database', function(done){

    const char = new MarioChar({
      name: 'Mario'
    });

    char.save().then(function(){
      assert(!char.isNew);
      done();
    });
  });
});
```

- Terminal

```
npm run test
```

You've seen the test example with saving data to the database using the save() method

thank you!
